

Popular Fine Dining Hangouts Fava and Caperberry Use IDS Next Restaurants Management Software - FortuneNEXT R&B

► About Fava & Caperberry

If you are out with family and Mediterranean food is on the menu, Fava is the place to be. Located at UB City, Bangalore, the spacious porch of the restaurant overlooks the amphitheater and is a wonderful place to catch up with friends or spend quality time with family.

But then few know that Fava hides a little secret beside it. Sister restaurant, Caperberry offers modernist European cuisine and is a wonderfully cozy 28 cover restaurant that piques your taste buds with unique and exotic flavors. If you are looking for an intimate table for two, or even a quiet business meal, Caperberry is just the place for you.

Both Fava and Caperberry are fine dining restaurants managed by famous Chef Abhijit Saha, and he is preparing to launch his third fine dining restaurant in Singapore!

With Fava and Caperberry sitting cheek by jowl, "We now have a better opportunity to offer variety to our discerning guests," said the unassuming yet highly passionate food connoisseur and owner, Chef Saha.

While Caperberry offers a subtle ambiance where patrons can pick from a highly customized modernist menu, Fava has a more gregarious touch, with its variety of wines, single malts, world beer, artisanal sandwiches, all-day menu, petit gourmet club, live grill and kids' specials too.

"As the owner, I need to have detail reports on the functioning of my restaurants including daily sales, popularity analysis, KOT audit, bill audit and cover analysis. FortuneNEXT R&B helps me to extract those reports, keeps me updated and enables me to plan my course of action"

► Why Caperberry and Fava Choose FortuneNEXT R&B

“Both Caperberry and Fava have been using FortuneNEXT R&B since their inception and it is this robust restaurant software that backs up our effort on delivering quality service,” said Chef Saha.

Caperberry has been using **FortuneNEXT R&B** for the last 5 years, while Fava has been using the software for 4 years.

FortuneNEXT R&B is a specially designed software for the niche needs of fine dining and quick service restaurants, food courts, take-away food outlets and other eateries. Over 700 restaurants across India, Middle East and Africa use this software and experience many operational benefits.

“Since my chefs and employees have previously worked in a number of different places, they were familiar with various restaurant softwares, but with a bit of exposure we have all learned to use FortuneNEXT R&B,” Saha added.

“As the owner, I need to have detail reports on the functioning of my restaurants including daily sales, popularity analysis, KOT audit, bill audit and cover analysis. FortuneNEXT R&B helps me to extract those reports, keeps me updated and enables me to plan my course of action,” added Chef Saha.

Saha also went on to add that, the software is feature rich and there is still much to learn about it. “We are quite impressed with the software as it has helped us on all vital fronts in running our restaurants. Thus, the software has definitely introduced a level of efficiency at both Caperberry and Fava. However training session from **IDS Next Advantage Academy** will help us to leverage the software more,” Saha said.

Fava and Caperberry are fantastic restaurants and we are delighted that they use our FortuneNEXT R&B and are successfully extracting value from it. The core goal of each of our software products is to help hoteliers or restaurant owners reduce costs, optimize use of manpower, enhance guest satisfaction and grow profits. We are doing just that for Fava and Caperberry.
