

PAX Technologically Empowers Goa Based 16 Degrees North

The boutique hotel has been using PAX since last 3 years

"IDS Next was our choicest hospitality software vendor. I have fair amount of exposure to IDS Next hotel software during my 10 years of stint in hospitality industry. I got in touch with IDS Next and they suggested me to opt for PAX, their small hotel management software."

Mr. Stephen Fernandes
General Manager
16 Degrees North

► About 16 Degrees North

Goa based 16 Degrees North is a 3 star boutique hotel that offers tranquility and high standard services to its guests. It has 16 rooms with all types of modern amenities and reflects contemporary décor with fashionable interiors. This tiny yet beautiful riverfront property located in Baga - Arpora, offers private sit-outs, swimming pool, pool side bar and restaurant, & penthouse with private terrace to its patrons. In 2013, 16 Degrees North was nominated to the World Boutique Hotel Awards in the 'New Design' category.

"Our property truly reflects the best that Goa has to offer. Our rooms are spacious and filled with everything a guest would require to have a relaxed and pampered holiday. Our sky lounge overlooking lush greenery and the Baga River is a hit among our guests. Our menu consists of Indian, continental, Chinese and quintessential Goan cuisine. We are sure our guests do like us for our quality and standard of services we offer," says Mr. Stephen Fernandes, General Manager at 16 Degrees North.

According to Mr. Stephen, this 3 year old popular boutique hotel located in North Goa has grown tremendously. While it has expanded its plush offerings/facilities, it has also managed to have a strong client base. "We were looking for a hotel management software that would grow with our business. Thus we ended up adopting PAX, from IDS Next. Since then, this small budget hotel software has continued to impress us like anything," Mr. Stephen added.

► About PAX

PAX is user-friendly and economically priced small budget hotel software from IDS Next. It works efficiently without any major investment on training.

► PAX Modules

Optional Interfaces

► Benefits of PAX to 16 Degrees North:

According to Mr. Stephen, PAX is the most user-friendly property management system for small hotel operation. "Our staff are happy to work on this smart hotel software. Training is minimal. Room allocation, check-in, check out and billing has become faster and more efficient with PAX," Mr. Stephen said. According to him, PAX has impressed the management so much that they are also planning to adopt this software at 16 Degrees North, Candolim, their upcoming service apartment.

Key Highlights and Benefits of PAX, the Small Hotel Management Software:

- Light and easy to install, so your hotel can go live quickly
- Simple wizard based set-up which helps you deploy the product fast
- Automated patch management system which prompts user when there is an application update available. This enables users to keep their product up-to-date all the time
- Automated email alerts on the hotel's current position to business owners and managers on the move. This improves the ability to manage multiple hospitality units without being physically present at site
- Define different rates in advance, access multiple rates for corporate /seasonal /Travel agents rates. Avoid last minute confusion on tariff offered to guest
- Audit trail for all transactions which makes it easy to monitor your hotels financials
- Fully automatic night audit and roll over process. No need of manual intervention

"The software automatically gets updated with new features and we don't have to worry about it. Technical support from IDS Next is good. I strongly recommend PAX as the best small budget hotel software available in India. I would rate PAX at 9 out of 10."
