

Press Release

IDS Next Launches Website for Small Hotel Software, PAX

PAX is a hotel management software for hotels in one star and below category. This product website will pitch PAX to hoteliers looking for world-class hotel software

Bangalore, 08 October 2014: IDS Next Business Solutions Pvt Ltd, a global leader in providing Hotel ERP and software solutions to hospitality and leisure industries, announced the launch of a dedicated and exclusive website for their small hotel software - PAX, <http://pax.idsnext.com/>. This hotel management software is primarily for hospitality properties in the one star and below category. Through this website, IDS Next aims to promote PAX among limited service hotels, bed and breakfast hotels, villas, gated communities, lodges and others.

Speaking on the launch of the PAX website Mr. Pradeepa Shetty, Vice President, Channel Sales said, "As a market leader, IDS Next strongly believes that limited services hotels should benefit from quality software that enables them to leverage online distribution channels like OTAs, automate and simplify guest service, plug revenue leakage and enhance profits. IDS Next launched PAX as there was a dearth of software for the specific needs of small hotels."

PAX is user-friendly and works efficiently without any major investment on training. What sets PAX uniquely apart from other small hotel software is it's real-time, two-way connect to several traditional and non-traditional online travel agents, web booking engine and mobile channels. This important feature helps small hotels sell more rooms and increase occupancy. Hoteliers can access real-time view of their hotels occupancy, books, and other vital statistics on their mobile devices, through the RexLite dashboard.

The visually attractive PAX website goes into detail on the four modules offered by the software namely Front Office Management and Housekeeping, Point of Sale, Accounts Receivables and Telephone Management. PAX also offers a host of interfaces to solutions like Tally Accounting System, Door Lock, Plutus Online Credit Card Settlement, EPABX System, Document Scanner and Web Camera. PAX has a number of hot keys for users to work rapidly on the software and does not require a night audit shut-down.
